PROFESSIONAL SUMMARY

Management student at BINUS University (expected 2028) with a strong interest in business analysis, process improvement, and the practical adoption of AI in enterprise operations. Brings hands-on experience from digital business concepts, entrepreneurial ventures, and client-facing creative work, where he has explored user needs, defined business requirements, assessed business models, and translated ideas into working prototypes and websites.

Combines business fundamentals with analytical thinking and digital fluency, including the everyday use of AI-assisted tools. Particularly interested in how organizations can identify the right business problems, redesign workflows, and apply data and AI responsibly, with clear governance and human oversight, to improve operational efficiency, decision quality, and business performance. Currently seeking a Business Analyst internship to build practical experience in real enterprise environments.

AREAS OF INTEREST

AI Adoption in Enterprise Business Processes

- Understanding how AI can be embedded into core business processes, such as sales, operations, procurement, finance, and customer service, to reduce manual effort and improve the flow of information across functions.
- Identifying use cases where AI adds measurable value, including automation of repetitive tasks (summarizing, sorting requests, drafting reports, extracting information), pattern detection, and forecasting support.
- Exploring the role of the Business Analyst in AI initiatives: framing the right problem, mapping As-Is and To-Be processes, defining requirements, data needs, and business rules, and validating the quality and relevance of AI outputs.
- Interested in responsible adoption, with human-in-the-loop review, clear accountability for decisions, change management, and success measures such as processing time, error rates, cost, and forecast accuracy.

Business Analysis & Process Improvement

- Workflow mapping, bottleneck identification, stakeholder needs analysis, and translating findings into practical, data-driven recommendations.

EDUCATION

BINUS University **EXPECTED 2028**
Bachelor's Degree in Management

- **Career focus:** Business Analyst Internship, with emphasis on business process analysis, data-driven decision-making, and digital/AI-enabled transformation.

EXPERIENCE

Freelance Video Editor & Creative Content **FREELANCE**

- Deliver video editing services to clients on a commission basis, interpreting client briefs and adapting creative output to project requirements, timelines, and expectations.
- Manage client communication and revisions end to end, strengthening skills in requirement gathering, expectation management, and quality delivery.

TikTok Affiliate Marketing **COLLABORATIVE PROJECT**

- Co-manage an affiliate account producing faceless promotional content, applying AI-assisted workflows and stock-based media to streamline content production.
- Explore product selection, content strategy, and audience engagement, gaining practical exposure to how AI tools can improve productivity in a commercial workflow.

Social Media & Visual Content **CREATIVE WORK**

- Create social media content, logos, brand identity assets, and presentation materials across a range of projects, communicating ideas clearly to different audiences.

SELECTED PROJECTS

DapatKerja — AI-Assisted Employment Platform **MINOR PROGRAM**
Digital business concept • dapatkerja.vercel.app

- Analyzed business requirements and user needs of job seekers and employers for a proposed AI-assisted employment platform.
- Developed a subscription-based business model and defined proposed platform features and user journeys.
- Built a front-end prototype to visualize the concept; backend, database, and automated services are not yet implemented.

StoryLink — Italian Charm Bracelet Business **VENTURE CREATION**
Entrepreneurial project • bracelet-storylink.vercel.app

- Co-created a student venture, assessing customer preferences, product presentation, and brand positioning.
- Designed and launched a website to build the business's online presence and showcase its products.
